The Fairness Award was created to recognize the role of collaborative leadership in removing the barriers to social and economic empowerment for poor and marginalized communities around the world. Past honorees have been individuals who exemplify a kind of leadership that is central to our belief that by integrating the work of “grassroots” and “grasstops” leaders a shared progress on the advancement of decent work and economic justice can be achieved. In this spirit we celebrate individuals each year who represent grassroots and grasstops leadership, and who join a distinguished list of past honorees and notable presenters of the Fairness Award.
